## **Standard Motor Products, Inc. Recognized as a Climate Leader for Third Consecutive Year**

NEW YORK, N.Y., April 23, 2025 – Standard Motor Products, Inc. (SMP), a leading automotive parts manufacturer and distributor, has once again been recognized in [USA Today's List of America's Climate Leaders](#). For the third consecutive year, SMP has been included on the list, which recognizes companies that have reduced greenhouse gas emissions and cut their carbon footprint. In order to make the list, companies must have demonstrated significant improvements in lowering their carbon intensity, setting a meaningful standard for emission reduction in the United States.

Following a public application period, companies underwent detailed data analysis. Compound annual reduction rate (CARR) of Scope 1 and 2 greenhouse gas emissions intensity relative to revenue was calculated over the course of the past several years. To earn a place on the list, companies with over \$50 million in revenue needed to demonstrate significant, sustained reductions.

Eric Sills, Chairman of the Board and Chief Executive Officer of SMP, stated, "We are very pleased to be recognized for our sustainability efforts for the third year in a row. Reducing our carbon footprint is a priority at SMP, and we remain committed to leveraging sustainability as a catalyst for positive change both within our organization and in the communities within which we operate."
